TradeLinker

Connecting People with Trusted Professionals

Introduction

TradeLinker is a proposed online service marketplace accessible through a website and mobile application. It connects individuals, hospitals, companies, and other organizations with skilled professionals for a wide range of services.

Business Overview

TradeLinker provides a central platform where customers can search for service providers, review their profiles, compare services, and submit booking requests. Professionals can register, showcase their skills, receive job requests, and manage their services through a dedicated dashboard.

Services Offered

TradeLinker will initially focus on the following services:

- Plumbing services
- Electrical services
- Painting and decoration
- Bike and motorcycle mechanics
- Car mechanics and repair
- Home maintenance and repair
- Commercial and organizational services

Additional categories, including construction, engineering, and real estate, may be introduced in the future.

Target Customers

The target market includes:

- Individuals and households
- Hospitals and healthcare facilities
- Offices and commercial businesses

- Construction companies
- Property managers and other organizations

Main Features

- Customer and professional registration
- Professional profiles and service listings
- Search and category filters
- Online booking requests
- Job and booking management
- Customer ratings and reviews
- Administrative dashboard

Premium Plan

TradeLinker will offer a Premium Plan for service providers who want to increase their visibility and attract more customers. Premium members will have access to additional features designed to support their businesses.

Premium Plan Features:

- Featured professional profile
- Higher visibility in search results
- Additional project photos and portfolio space
- Priority access to customer enquiries
- Booking and enquiry management tools

- Premium membership badge

The Premium Plan will be available through monthly or yearly subscriptions. Pricing and benefits will be finalized according to market demand and customer needs.

Mission and Objectives

The mission of TradeLinker is to simplify access to skilled professionals while helping workers and service businesses reach more customers.

The main objectives are to:

- Connect customers with suitable professionals.
- Help skilled workers find more job opportunities.
- Provide an easy-to-use service marketplace.
- Improve visibility and trust through professional profiles and customer reviews.
- Support businesses and organizations in finding reliable service providers.

Future Development

TradeLinker aims to expand its features and services over time. Future developments may include:

- Online payment integration
- Verified professional profiles
- Real-time notifications

- Dedicated mobile applications
- Location-based service matching
- Company and organizational accounts
- Additional professional categories
- Expansion into more cities and international markets

Conclusion

TradeLinker aims to become a convenient digital marketplace for finding and hiring skilled professionals. By connecting customers, workers, and organizations through one platform, the business seeks to create valuable opportunities for service providers and make professional services easier to access.
